

LETTER OF RECOMMENDATION

It is with great pleasure and enthusiasm that I Dr. Somayaji Siva Rama Krishnan, faculty of Information Technology and Engineering at Vellore Institute of Technology can recommend **Sarthak Gupta** for his higher studies at your esteemed Institute. I have been acquainted with Mr. Sarthak for 3 years as his professor during his graduation from Vellore Institute of Technology, Vellore. Sarthak enrolled in a course “**Storage Technologies**” offered by me during the Winter Semester – 2021.

Sarthak is a more-than exceptional student; He embodies sincerity, is responsible, reliable, self-starting, and creative at the same time. In my course also Sarthak achieved the highest grade in the class. Other than the curriculum he invested his time in writing a research paper on “Prediction of suitable RAID technology for an application using Machine Learning”. This paper was also submitted to IEEE globe comm for the conference of 2021. Even with a team size of 2 people he achieved exceptional results in his paper. He stayed late after the normal course hours to discuss with me the enhancements which can be made in the Pre-existing Machine Learning Algorithms. His attention to minor details is a quality that I would like to endorse. Doing a research paper in the field of Data Science combined with Storage Technologies outside of his normal curriculum responsibilities is something I will always appreciate.

With majors in Information Technology, Sarthak connects very well with technology. He possesses a really good skill set in Machine Learning, Data Science, Data Structures with really good problem-solving skills. He is also socially active, being the president of a technical student chapter “**Association for Computing Machinery**”. He has always forged relationships for community growth and has always inspired other college students about computer science and has encouraged diversity in the field.

I have no doubt that Sarthak is well prepared and he will rise beyond expectations. With sincere conviction, I recommend, **Mr. Sarthak Gupta** unambiguously for the admission process for the master’s course she wishes to pursue at your prestigious university.
